### Nothing but Blue Skies

Apr 1, 2007 12:00 PM, By Beck Ireland, Staff Writer

Revenue for overall design services remained hot for the majority of engineering firms in EC&M's 2007 Top 40 list. Commanding a sunny average year-over-year...

Rosslyn, Va.-based National Electrical Manufacturers Association's (NEMA) Low Voltage Distribution Equipment Section (LVDE) recently launched a Web site devoted to educating homeowners, electrical contractors, and those involved in home construction about arc fault circuit interrupters (AFCIs). "AFCIs are a technological leap forward in home safety, and they have significant potential to save lives and loss of property caused by electrical fires in the home," says Gerard Winstanley, LVDE technical program manager for NEMA. "The new website is NEMA's way to make homeowners, builders and electrical contractors aware of the safety benefits that AFCIs provide."

For more information, visit the [NEMA Web site](#).
